

PRESS RELEASE

**DP World joins forces with Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping
to help decarbonize the maritime industry**

Copenhagen/Dubai, 26 January, 2022

GLOBAL leader in supply chain solutions DP World reinforces its commitment to being a world leader in sustainability by entering a strategic partnership with Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping (the Center).

Launched in 2020 as an independent, not-for-profit organisation, the Center is undertaking intensive research and development to find practical ways to decarbonize the maritime industry through several global initiatives.

As a partner, DP World is committing to long-term strategic collaboration and contribution to the development of zero carbon technologies and solutions for the maritime industry. DP World will make several of its specialists available to the Center in Copenhagen to provide insights to end to end supply chains and help demonstrate and test new solutions across the value chain in a live setting.

In welcoming DP World to the Center, **Bo Cerup-Simonsen, CEO of Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping**, said: “Decarbonizing the maritime industry is changing an entire business system and it requires completely new supply chains and structures. DP World brings extensive and very valuable expertise in integrated logistics and infrastructure, and they have a deep understanding of the complexity we are facing. Their proactive response to addressing climate change and strong sustainability focus is very aligned with our mission and we look very much forward to having DP World onboard”

Sultan Ahmed bin Sulayem, Group Chairman and CEO of DP World, said: “DP World moves 10 per cent of global cargo and we are excited to be working alongside other leading organisations committed to a collaborative approach to solving the challenges of achieving zero-carbon economies.”

“Our Marine Services business including the Unifeeder Group, represent almost 75% of our carbon footprint through their fleet of vessels and working with the Center is an important part of developing solutions as we pursue our own net zero target by 2040.”

About DP World

We are the leading provider of worldwide smart end-to-end supply chain logistics, enabling the flow of trade across the globe. Our comprehensive range of products and services covers every link of the integrated supply chain – from maritime and inland terminals to marine services and industrial parks as well as technology-driven customer solutions.

We deliver these services through an interconnected global network of 190 business units in 68 countries across six continents, with a significant presence both in high-growth and mature markets. Wherever we operate, we integrate sustainability and responsible corporate citizenship into our activities, striving for a positive contribution to the economies and communities where we live and work.

Our dedicated, diverse and professional team of more than 70,000 employees from 147 nationalities are committed to delivering unrivalled value to our customers and partners. We do this by focusing on mutually beneficial relationships – with governments, shippers, traders, and other stakeholders along the global supply chain – relationships built on a foundation of mutual trust and enduring partnership.

We think ahead, anticipate change and deploy industry-leading digital technology to further broaden our vision to disrupt world trade and create the smartest, most efficient and innovative solutions, while ensuring a positive and sustainable impact on economies, societies and our planet.

About the Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping

The Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping is a not-for-profit, independent research- and development center working across the energy- and shipping sectors with industry, academia and authorities. With Partners, the Center explores viable decarbonization pathways, facilitates the development and implementation of new energy technologies; builds confidence in new concepts and their supply chains; and accelerates the transition by defining and maturing viable strategic pathways to the required systemic change. The Center is placed in Copenhagen but work with partners globally.

The Center was founded in 2020 with a start-up donation of DKK 400m from the A.P. Moller Foundation. Corporate Partners to the Center include: Alfa Laval, American Bureau of Shipping, A.P. Moller - Maersk, bp, Cargill, Haldor Topsoe, MAN Energy Solutions, Mitsubishi Heavy Industries, Mitsui, NORDEN, NYK Line, Seaspan Corporation, Siemens Energy, Stolt Tankers, Sumitomo Corporation, Swire Group, TotalEnergies and V.Group.
